

North Hamilton Road Improvements - Morse Road to Dublin-Granville Road

The city of Columbus has completed preliminary engineering on improvements to North Hamilton Road between Morse Road and Dublin-Granville Road.

Goals and Objectives:

- Increase safety and reduce accidents and congestion
- Provide accommodations for pedestrians, bicyclists and the mobility impaired
- Facilitate public transit
- Improve air quality

Alternatives Evaluated:

- Widen existing N. Hamilton Road to provide two lanes in each direction and a raised center median (Alternative 1)
- Same as bullet above but with a center turn lane in sections (Alternative 2)
- Selected Alternative: Alternative 2

Additional Features for Alternatives Above:

- Realign N. Hamilton Road to eliminate the offset intersections with Dublin-Granville Road (see dashed line on map on back side)
- Modify existing traffic movements in and out of driveways to help reduce crashes
- Build bike lanes and a shared-use path for pedestrians and bicyclists
- Add overhead street lights

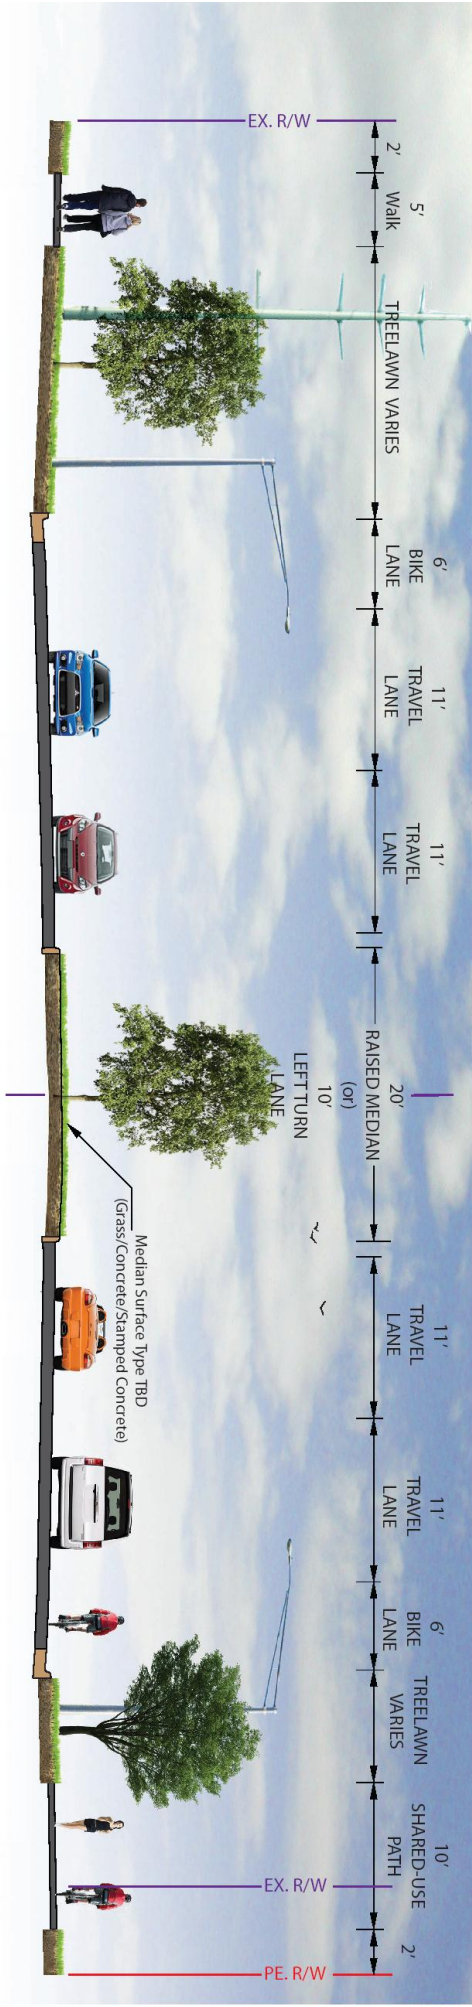

Schedule:

Preliminary engineering is complete. No further phases are currently funded.
